

Jervoiois Joins Metalshub to Expand Cobalt Sulfate Marketing Options

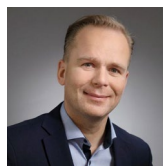

Düsseldorf, Germany, 25 May 2026 – Metalshub, the leading platform provider for the metals and mining industry, is pleased to announce that Jervoiois Finland, one of Europe’s leading cobalt producers and specialty chemical manufacturers, has joined Metalshub’s digital marketplace to sell cobalt sulphate. This collaboration provides cobalt users with easier access to a verified cobalt supply chain.

Located in Kokkola, Finland, Jervoiois is one of the world’s largest cobalt producers outside China, serving customers globally across battery materials, industrial, and specialty chemicals markets. By leveraging the Metalshub platform, Jervoiois aims to access a broader network of qualified cobalt sulfate buyers worldwide.

Through Metalshub’s digital Sales Solution, Jervoiois will enhance its commercial processes by leveraging structured request-for-bid workflows and improved market intelligence. The move reflects growing industry demand for more efficient and auditable raw material sales channels, particularly for critical battery materials essential to the global energy transition.

“As one of Europe’s leading producers of refined cobalt products, we recognize the growing importance of transparent, efficient, and digital sales channels in today’s evolving market environment. By partnering with Metalshub, we aim to strengthen price discovery for cobalt sulphate while expanding our reach to new customers globally, supporting a more transparent and resilient cobalt supply chain.”

—**Sami Kallioinen, President of Jervoiois Finland**

“We are happy to welcome Jervoiois to the Metalshub platform,” added Dr. Frank Jackel, Co-Founder and Managing Director of Metalshub. “As a globally significant producer of advanced cobalt products, Jervoiois brings substantial market leadership to our growing battery materials ecosystem. Its decision to leverage Metalshub underscores the increasing importance of digital tools in fostering transparent pricing, commercial optimisation, and resilient supply chains for critical raw materials.”

This collaboration comes at a pivotal time for the cobalt market, as manufacturers, battery producers, and industrial consumers seek greater transparency and efficiency amid evolving

global demand dynamics, geopolitical supply considerations, and stricter sustainability requirements.

About Jervois

Jervois Finland, based in Kokkola, Finland, is one of Europe's leading cobalt and specialty chemical manufacturers. Operating one of the largest cobalt production facilities outside China, it produces advanced cobalt products for the battery, industrial, and specialty chemicals sectors. With five decades of operational expertise, Jervois plays a critical role in supporting secure, sustainable, responsibly sourced, and globally diversified supply chains for critical battery materials.
